

Math Curriculum

Fifth Grade

By the end of fifth grade students have applied addition, subtraction, multiplication, and division algorithms to fractions and decimals, mastered place value to the billions place, and used associated vocabulary. They have applied and adapted a variety of appropriate strategies to solve problems. Students identified, constructed, and classified geometric figures by their properties using appropriate terminology, as well as provided proof/explanation for their reasoning. They applied learned measurement skills/strategies to real world situations using both customary and metric units of measure. They understood and applied data collection, organization, representation, and vocabulary to communicate, reason, and justify their real world solutions.

Archdiocese of Santa Fe Standard 1:

Numbers and Operations:

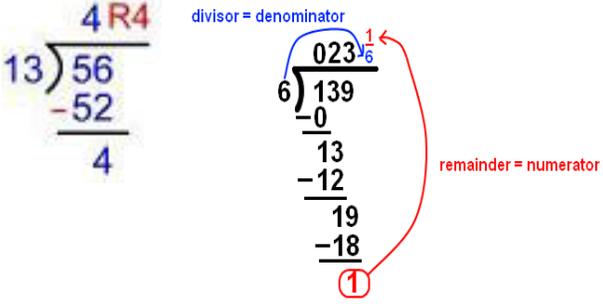

Students understand numbers, ways of representing numbers, relationships among numbers, and number systems; understand meanings of operations and how they relate to one another; and compute fluently and make reasonable estimates. NCTM

Critical for Mastery in Grade 5

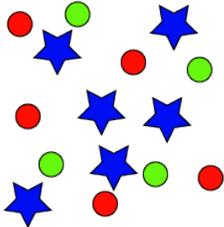

LEARNING OUTCOMES (What students will be able to do, know, understand and value)	SAMPLE ASSESSMENTS/STRATEGIES (What evidence will demonstrate that students have achieved the Learning Outcome)	BEST PRACTICES
A. Number Sense: Understand numbers, ways of representing numbers, relationships among numbers, and number systems.		
1. Read whole numbers to 100 billion.	<ul style="list-style-type: none"> • When given a number students will be able to read number orally (i.e. 75,283,419,123). 	
2. Write to 100 billion in: <ul style="list-style-type: none"> • Standard • Expanded • Word form 	<ul style="list-style-type: none"> • Standard: 9,219,243,178 • Expanded: 9,000,000,000 + 200,000,000+10,000,000+9,000,000+ 200,000+40,000+3,000+100+70+8 • Word: Nine billion, two hundred nineteen million, two hundred forty-three 	

	thousand, one hundred seventy-eight.																			
3. Estimate by rounding whole numbers to 1 billions place.	<ul style="list-style-type: none"> 7,123,469,452 rounded to 7,000,000,000 																			
4. Identify Place Value to 100 Billions Place.	<ul style="list-style-type: none"> Name the place value of the underlined digit. <u>7</u>2,489,234,124 123,4<u>5</u>6,789,987 																			
5. Compare numbers to 1,000,000,000 using the inequality symbols $<$, $>$ and $=$.	<ul style="list-style-type: none"> $1,000,000,000 > 1,000,000$ $123,456,789 < 213,456,789$ 																			
6. Determine if a number is prime or composite.	<ul style="list-style-type: none"> Prime: two factors (1 and itself) Composite: more than two factors <table border="1"> <thead> <tr> <th>Number</th> <th>Factors</th> <th>Type</th> </tr> </thead> <tbody> <tr> <td>2</td> <td>1,2</td> <td>Prime</td> </tr> <tr> <td>3</td> <td>1,3</td> <td>Prime</td> </tr> <tr> <td>4</td> <td>1,2,4</td> <td>Composite</td> </tr> <tr> <td>5</td> <td>1,5</td> <td>Prime</td> </tr> <tr> <td>6</td> <td>1,2,3,6</td> <td>Composite</td> </tr> </tbody> </table>	Number	Factors	Type	2	1,2	Prime	3	1,3	Prime	4	1,2,4	Composite	5	1,5	Prime	6	1,2,3,6	Composite	
Number	Factors	Type																		
2	1,2	Prime																		
3	1,3	Prime																		
4	1,2,4	Composite																		
5	1,5	Prime																		
6	1,2,3,6	Composite																		
7. Apply special classes of numbers. a) Even, Odd b) Factors c) Multiples d) Square Numbers and Square Roots	<p>a) Even end with 0,2,4,6,8 Odd end with 1,3,5,7,9</p> <p>b) Factors of 20 (1,2,4,5,10,20)</p> <p>c) Multiples of 4 (4,8,12,16,20)</p> <p>d) Square Numbers and Square Roots</p> $1^2 = 1 \quad \sqrt{1} = 1$ $2^2 = 4 \quad \sqrt{4} = 2$ $3^2 = 9 \quad \sqrt{9} = 3$ $4^2 = 16 \quad \sqrt{16} = 4$ $5^2 = 25 \quad \sqrt{25} = 5$																			
8. Demonstrate finding prime factorization up to 50.																				

9. Determine Greatest Common Factor (GCF) for a set of two whole numbers.	<ul style="list-style-type: none"> Find the GCF for 12 and 18 Factors of 12: 1,2,3,4,6,12 Factors of 18: 1,2,3,6,9,18 GCF is 6 	
10. Determine Least Common Multiple (LCM) for a set of two whole numbers.	<ul style="list-style-type: none"> Least Common Multiple of 4 and 6 Multiples of 4: 4,8,12,16, Multiples of 6: 6,12,18 LCM is 12 	
B. Addition and Subtraction: Compute fluently and make reasonable estimates.		
1. Add and subtract up to millions place with or without regrouping.	$\begin{array}{r} 1,437,284 \\ +2,127,498 \\ \hline \end{array}$ $\begin{array}{r} 2,234,589 \\ - 123,489 \\ \hline \end{array}$ $\begin{array}{r} 89,786 \\ 26,428 \\ 57,814 \\ +91,875 \\ \hline \end{array}$	
2. Add groups of numbers looking for combinations of 10.	$4+7+3+6=$ $43+29+467+94=$	
3. Add and subtract decimals to thousandths.	$4.3 + 2 =$ $24.6 - 8 =$ $9 + 4.8 + 0.62 =$ $6.2 - 0.71 =$	
4. Evaluate reasonableness of solutions by comparing estimate to actual answer.	$\begin{array}{r} 585 \\ +312 \\ \hline \end{array}$ Estimate: 600 $\begin{array}{r} 300 \\ +300 \\ \hline \end{array}$	
C. Multiplication and Division: Compute fluently and make reasonable estimates.		
1. Multiply a 4 digit number by a 1 or 2 digit number.	$\begin{array}{r} 4098 \\ \times 7 \\ \hline \end{array}$ $\begin{array}{r} 378 \\ \times 23 \\ \hline \end{array}$ $\begin{array}{r} 4578 \\ \times 59 \\ \hline \end{array}$	
2. Divide a 4 digit number by a 1 or 2 digit divisor with and without a remainder.	$\begin{array}{r} 1,283 \\ 6 \overline{) 7,698} \\ \underline{6} \\ 16 \\ \underline{12} \\ 49 \\ \underline{48} \\ 18 \\ \underline{18} \\ 0 \end{array}$ $377 \div 80$	

<p>3. Divide and express remainder as a whole number or as a fraction.</p>																			
<p>4. Use divisibility rules for 2,3,4,5,6,9, and 10.</p>	<table border="1" data-bbox="737 537 1373 1062"> <thead> <tr> <th>Number is divisible by:</th> <th>Rule</th> </tr> </thead> <tbody> <tr> <td>2 if</td> <td>The last digit is even (0,2,4,6,8,)</td> </tr> <tr> <td>3 if</td> <td>The sum of the digits is divisible by 3</td> </tr> <tr> <td>4 if</td> <td>The last two digits are divisible by 4</td> </tr> <tr> <td>5 if</td> <td>The last digit is 0 or 5</td> </tr> <tr> <td>6 if</td> <td>The number is both divisible by 2 and 3</td> </tr> <tr> <td>9 if</td> <td>The sum of the digits is divisible by 9</td> </tr> <tr> <td>10 if</td> <td>The number ends in zero</td> </tr> </tbody> </table>		Number is divisible by:	Rule	2 if	The last digit is even (0,2,4,6,8,)	3 if	The sum of the digits is divisible by 3	4 if	The last two digits are divisible by 4	5 if	The last digit is 0 or 5	6 if	The number is both divisible by 2 and 3	9 if	The sum of the digits is divisible by 9	10 if	The number ends in zero	
Number is divisible by:	Rule																		
2 if	The last digit is even (0,2,4,6,8,)																		
3 if	The sum of the digits is divisible by 3																		
4 if	The last two digits are divisible by 4																		
5 if	The last digit is 0 or 5																		
6 if	The number is both divisible by 2 and 3																		
9 if	The sum of the digits is divisible by 9																		
10 if	The number ends in zero																		
<p>5. Division with zeros in the quotient.</p>	$121 \div 3 =$ $4818 \div 8 =$																		
<p>6. Evaluate reasonableness of solutions by comparing estimate to actual answer.</p>	527×49 Estimate: 500×50																		
<p>D. Properties: Understand the meaning of operations and how they relate to one another.</p>																			
<p>1. Select and use appropriate operations to solve problems.</p>	<ul style="list-style-type: none"> • Sum=Addition • Difference=Subtraction • Product=Multiplication • Quotient=Division 																		

<p>7. Add and subtract mixed numbers with like denominators.</p>	$\begin{array}{r} 2 \frac{1}{3} \\ + 7 \frac{1}{3} \\ \hline 9 \frac{2}{3} \end{array}$ $\begin{array}{r} 2 \frac{4}{3} \\ - 1 \frac{2}{3} \\ \hline 1 \frac{2}{3} \end{array}$	
<p>8. Add and subtract mixed numbers with unlike denominators.</p>	$4 \frac{1}{3} + 3 \frac{2}{5} = 7 \frac{11}{15}$ $3 - 1 \frac{1}{4} = 2 \frac{3}{4}$	
<p>9. Recognize fractions as division.</p>	$\frac{13}{5} = 13 \div 5$	
<p>10. Recognize mixed numbers as the sum of a whole number and a fraction.</p>	$1 + \frac{3}{4} = 1\frac{3}{4}$	
<p>11. Read and write fractions and mixed numbers.</p>	<ul style="list-style-type: none"> • $\frac{1}{4}$ = one fourth, $\frac{1}{2}$ = one half, $\frac{3}{4}$ = three fourths • $1 \frac{1}{4}$ = one and one fourth • $1 \frac{1}{2}$ = one and one half • $1 \frac{3}{4}$ = one and three fourths 	
<p>12. Convert mixed numbers to improper fractions and improper fractions to mixed numbers.</p>	<ul style="list-style-type: none"> • Mixed number to improper fraction $4\frac{3}{5} = \frac{4 \cdot 5 + 3}{5} = \frac{23}{5}$ <ul style="list-style-type: none"> • Improper fraction to mixed number $\frac{13}{5} = 13 \div 5 \quad \begin{array}{r} 2 \\ 5 \overline{)13} \\ \underline{-10} \\ 3 \end{array}$	
<p>13. Multiply and divide fractions.</p>	<div style="border: 1px solid red; padding: 5px; display: inline-block;"> $\frac{3}{4} \times \frac{1}{2} = \frac{3 \times 1}{4 \times 2} = \frac{3}{8}$ </div> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> $\frac{2}{5} \div \frac{3}{4} = \frac{2}{5} \times \frac{4}{3} = \frac{8}{15}$ </div>	

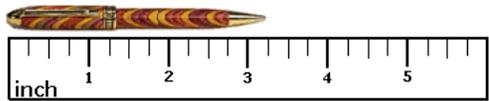

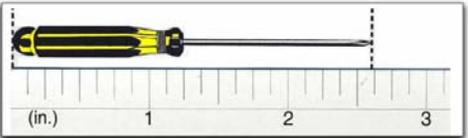

<p>14. Find equivalent fractions.</p>	<ul style="list-style-type: none"> Find the numerator that completes each equivalent fraction: $\frac{1}{2} = \frac{1 \times 5}{2 \times 5} = \frac{5}{10}$ $1/3 = 3/9$ $\frac{3}{5} = \frac{3 \times 2}{5 \times 2} = \frac{6}{10}$ $2/3 = 10/15$ 	
<p>15. Reduce a fraction to simplest form.</p>	$\frac{4}{10} = \frac{4 \div 2}{10 \div 2} = \frac{2}{5}$	
<p>16. Identify and write a ratio for a picture.</p>	 <p>Green balls to red balls 4:5 Red balls to green balls 5:4 Blue stars to green balls 6:4 Blue stars to purple hearts 6:0</p>	
<p>17. Express a percent as a fraction and as a decimal.</p>	<ul style="list-style-type: none"> $25\% = \frac{1}{4} = 0.25$ $50\% = \frac{1}{2} = 0.50$ $75\% = \frac{3}{4} = 0.75$ 	
<p>18. Use percent to name part of a group.</p>	<ul style="list-style-type: none"> The team won $\frac{2}{3}$ of its games. Find the percent of the games they won. $\frac{2}{3} \times 100\% = \frac{200\%}{3} \quad 200 \div 3 = 66 \frac{2}{3} \% \text{ games won}$	

Archdiocese of Santa Fe Standard 2:

Measurement:

Students understand measurable attributes of objects and the units, systems and processes of measurement; and apply the appropriate techniques, tools, and formulas to determine measurements. NCTM

Critical for Mastery in Grade 5

LEARNING OUTCOMES (What students will be able to do, know, understand and value)	SAMPLE ASSESSMENTS/STRATEGIES (What evidence will demonstrate that students have achieved the Learning Outcome)	BEST PRACTICES										
A. Linear Measurement: Understand measurable attributes of objects, and the units, systems, and processes of appropriate measurement.												
1. Identify units of length in US Customary and Metric Systems.	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="text-align: center; width: 50%;">US Customary</td> <td style="text-align: center; width: 50%;">Metric</td> </tr> <tr> <td style="border: 1px solid black; padding: 2px;">12 in.</td> <td style="border: 1px solid black; padding: 2px;">1 ft.</td> </tr> <tr> <td style="border: 1px solid black; padding: 2px;">3 ft.</td> <td style="border: 1px solid black; padding: 2px;">1 yd.</td> </tr> <tr> <td style="border: 1px solid black; padding: 2px;">36 in.</td> <td style="border: 1px solid black; padding: 2px;">1 yd.</td> </tr> <tr> <td style="border: 1px solid black; padding: 2px;">5280 ft.</td> <td style="border: 1px solid black; padding: 2px;">1 mi.</td> </tr> </table>	US Customary	Metric	12 in.	1 ft.	3 ft.	1 yd.	36 in.	1 yd.	5280 ft.	1 mi.	
US Customary	Metric											
12 in.	1 ft.											
3 ft.	1 yd.											
36 in.	1 yd.											
5280 ft.	1 mi.											
2. Convert within US Customary units and metric units.	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="text-align: center;">3 ft. = ___ in.</td> <td style="text-align: center;">5 cm = ___ mm</td> </tr> <tr> <td style="text-align: center;">2 yd. = ___ ft.</td> <td style="text-align: center;">2 km = ___ m</td> </tr> </table>	3 ft. = ___ in.	5 cm = ___ mm	2 yd. = ___ ft.	2 km = ___ m							
3 ft. = ___ in.	5 cm = ___ mm											
2 yd. = ___ ft.	2 km = ___ m											
3. Measure to nearest 1/4, and 1/8 of an inch.	<div style="display: flex; align-items: center; margin-bottom: 10px;">  <div style="margin-left: 20px;">3 1/4 in.</div> </div> <div style="display: flex; align-items: center;">  <div style="margin-left: 20px;">2 5/8 in.</div> </div>											
4. Measure to nearest mm or cm.	<div style="display: flex; align-items: center;">  </div> <p>3cm, 30mm</p>											
B. Weight: Understand measurable attributes of objects, and the units, systems, and processes of appropriate measurement.												

<p>1. Convert within US Customary units and metric units of measurement.</p>	<table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: left; border: none;">US Customary</th> <th colspan="2" style="text-align: left; border: none;">Metric</th> </tr> </thead> <tbody> <tr> <td style="border: 1px solid black; padding: 2px;">16 oz.</td> <td style="border: 1px solid black; padding: 2px;">1 lb.</td> <td style="border: 1px solid black; padding: 2px;">1000 g</td> <td style="border: 1px solid black; padding: 2px;">1 kg</td> </tr> <tr> <td style="border: 1px solid black; padding: 2px;">2000 lb.</td> <td style="border: 1px solid black; padding: 2px;">1 ton</td> <td></td> <td></td> </tr> </tbody> </table> <p style="margin-left: 40px;">How many tons is a 4000 lb. elephant? 2 pounds of sugar is how many ounces? 3 kg = ___g</p>	US Customary		Metric		16 oz.	1 lb.	1000 g	1 kg	2000 lb.	1 ton			
US Customary		Metric												
16 oz.	1 lb.	1000 g	1 kg											
2000 lb.	1 ton													
<p>C. Temperature: Understand measurable attributes of objects, and the units, systems, and processes of appropriate measurement.</p>														
<p>1. No objectives.</p>														
<p>D. Time: Understand measurable attributes of objects, and the units, systems, and processes of appropriate measurement.</p>														
<p>1. No objectives.</p>														
<p>E. Money: Understand measurable attributes of objects, and the units, systems, and processes of appropriate measurement.</p>														
<p>1. Add, subtract multiply and divide money amounts.</p>	<table style="margin-left: 20px;"> <tr> <td style="color: red; padding-right: 20px;">$\begin{array}{r} \\$6.57 \\ + \\$2.41 \\ \hline \\$8.98 \end{array}$</td> <td style="color: blue; padding-right: 20px;">$\begin{array}{r} \\$9.85 \\ - \\$4.36 \\ \hline \\$5.49 \end{array}$</td> <td style="padding-right: 20px;">$\begin{array}{r} \\$7.50 \\ \times 11 \\ \hline 750 \\ +5700 \\ \hline \\$64.50 \end{array}$</td> <td>$\begin{array}{r} \\$ 5.70 \\ 7 \overline{) \\$ 3.99} \\ \underline{- 35} \\ 49 \\ \underline{- 49} \\ 0 \end{array}$</td> </tr> </table>	$\begin{array}{r} \$6.57 \\ + \$2.41 \\ \hline \$8.98 \end{array}$	$\begin{array}{r} \$9.85 \\ - \$4.36 \\ \hline \$5.49 \end{array}$	$\begin{array}{r} \$7.50 \\ \times 11 \\ \hline 750 \\ +5700 \\ \hline \$64.50 \end{array}$	$\begin{array}{r} \$ 5.70 \\ 7 \overline{) \$ 3.99} \\ \underline{- 35} \\ 49 \\ \underline{- 49} \\ 0 \end{array}$									
$\begin{array}{r} \$6.57 \\ + \$2.41 \\ \hline \$8.98 \end{array}$	$\begin{array}{r} \$9.85 \\ - \$4.36 \\ \hline \$5.49 \end{array}$	$\begin{array}{r} \$7.50 \\ \times 11 \\ \hline 750 \\ +5700 \\ \hline \$64.50 \end{array}$	$\begin{array}{r} \$ 5.70 \\ 7 \overline{) \$ 3.99} \\ \underline{- 35} \\ 49 \\ \underline{- 49} \\ 0 \end{array}$											
<p>2. Make change to values greater than \$10.</p>	<ul style="list-style-type: none"> • Eric bought a pair of sunglasses for \$21. He gave the sales person \$50. How much change should Eric get back? \$50 - \$21 = \$29 													
<p>F. Capacity: Understand measurable attributes of objects, and the units, systems, and processes of appropriate measurement.</p>														

1. Convert within US Customary units and metric units of measurement.	US Customary	Metric									
	<table border="1"> <tr><td>8 fl. oz.</td><td>1 cup</td></tr> <tr><td>2 cups</td><td>1 pint</td></tr> <tr><td>2 pints</td><td>1 quart</td></tr> <tr><td>4 quarts</td><td>1 gallon</td></tr> </table> <p>How many pints equal a gallon? 8 pints 4 liters equal _____ mL (4000 mL)</p>	8 fl. oz.	1 cup	2 cups	1 pint	2 pints	1 quart	4 quarts	1 gallon	<table border="1"> <tr><td>1000 mL</td><td>1L</td></tr> </table>	1000 mL

Archdiocese of Santa Fe Standard 3:

Algebra and Problem Solving:

Students understand patterns, relations, and functions; represent and analyze mathematical situations and structures using algebraic symbols; use mathematical models to represent and understand quantitative relationships; analyze change in various contexts; and apply and adapt a variety of appropriate strategies to solve problems. NCTM

Critical for Mastery in Grade 5

LEARNING OUTCOMES (What students will be able to do, know, understand and value)	SAMPLE ASSESSMENTS/STRATEGIES (What evidence will demonstrate that students have achieved the Learning Outcome)	BEST PRACTICES
A. Variables and Expressions: Represent and analyze mathematical situations and structures using algebraic symbols.		
1. Simplify expressions using order of operations.	Parenthesis Exponents Multiplication or division Addition or subtraction $8 - (4 + 2) =$ $8 - 6 =$ 2	
2. Find the missing factor in a multiplication expression.	$12 \cdot N = 60$ $N = 5$	

3. Read exponents	$4^2 =$ four squared 4×4 $4^3 =$ four cubed $4 \times 4 \times 4$ $4^4 =$ four to the 4 th power $4 \times 4 \times 4 \times 4$	
4. Write a power as a whole number	$2^4 = 2 \times 2 \times 2 \times 2 = 16$	
B. Equations: Use mathematical models to represent and understand quantitative relationships.		
1. Create and solve an equation from a world problem.	<ul style="list-style-type: none"> Tammy wants to buy a camera. She has \$24. The Camera cost \$41. How much more money does Tammy need? $\\$24 + m = \\41 $m = \\$17$ Thirty desks were arranged in 6 equal rows. How many desks are in each row? $6N = 30$ $N = 5$ desks 	
2. Determine the value of a variable in a simple equation.	$8 + w = 15$ $24 + m = 37$ $n - 73 = 800$ $w = 7$ $m = 13$ $n = 873$	
C. Inequality: Represent and analyze mathematical situations and structures using algebraic symbols.		
1. Compare two integers on a number line (+ and – numbers).		
2. Compare whole numbers to 100,000 using the inequality symbols.	$23,465 < 23,654$ $365 + 366 > 365 + 365$	
3. Compare fractions, decimals, and negative numbers using inequality symbols.	$\frac{1}{4} < \frac{1}{2}$, $\frac{2}{3} > \frac{2}{6}$ $0.12 = 0.120$, $1.1 < 2.0$ $-5 > -7$, $-2 < 0$	
D. Patterns, Sequences and Functions: Understand change in various contexts.		

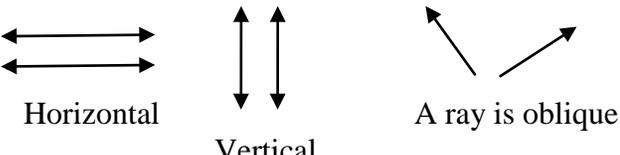

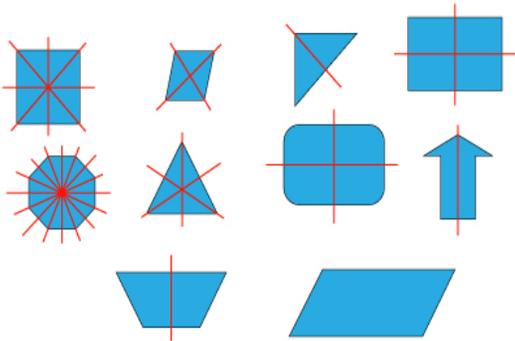

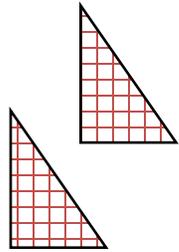

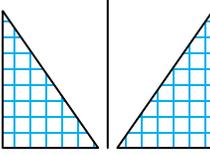

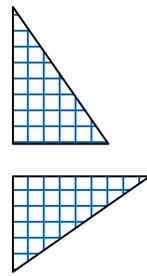

1. Complete a pattern and identify the rule of the pattern.	 <p>Next number is 6 then 5 circles. Use even numbers and continue to add one circle after each.</p>																																	
2. Find the missing number in a sequence and describe the rule for each.	<p>84, 77, 70, n n = 63 subtract 7 9, 18, 27, n n = 36 add 9</p>																																	
E. Functions:																																		
1. Complete a function table using addition, subtraction, multiplication and division.	<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> $x + 7 = y$ <table border="1" style="margin: auto;"> <thead> <tr><th>Input (x)</th><th>Output (y)</th></tr> </thead> <tbody> <tr><td>1</td><td>8</td></tr> <tr><td>5</td><td>12</td></tr> <tr><td>7</td><td>14</td></tr> </tbody> </table> </div> <div style="text-align: center;"> $x - 3 = y$ <table border="1" style="margin: auto;"> <thead> <tr><th>Input (x)</th><th>Output (y)</th></tr> </thead> <tbody> <tr><td>10</td><td>7</td></tr> <tr><td>8</td><td>5</td></tr> <tr><td>5</td><td>2</td></tr> </tbody> </table> </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 20px;"> <div style="text-align: center;"> $x(2) = y$ <table border="1" style="margin: auto;"> <thead> <tr><th>Input (x)</th><th>Output (y)</th></tr> </thead> <tbody> <tr><td>2</td><td>4</td></tr> <tr><td>4</td><td>8</td></tr> <tr><td>6</td><td>12</td></tr> </tbody> </table> </div> <div style="text-align: center;"> $x \div 5 = y$ <table border="1" style="margin: auto;"> <thead> <tr><th>Input (x)</th><th>Output (y)</th></tr> </thead> <tbody> <tr><td>50</td><td>10</td></tr> <tr><td>25</td><td>5</td></tr> <tr><td>5</td><td>1</td></tr> </tbody> </table> </div> </div>	Input (x)	Output (y)	1	8	5	12	7	14	Input (x)	Output (y)	10	7	8	5	5	2	Input (x)	Output (y)	2	4	4	8	6	12	Input (x)	Output (y)	50	10	25	5	5	1

Archdiocese of Santa Fe Standard 4:

Geometry:

Students analyze characteristics and properties of two-and-three dimensional geometric shapes and develop mathematical arguments about geometric relationships; specify locations and describe spatial relationships using coordinate geometry and other representational systems; apply transformations and use symmetry to analyze mathematical situations; and use visualization, spatial reasoning, and geometric modeling to solve problems. NCTM

Critical for Mastery in Grade 5

LEARNING OUTCOMES (What students will be able to do, know, understand and value)	SAMPLE ASSESSMENTS/STRATEGIES (What evidence will demonstrate that students have achieved the Learning Outcome)	BEST PRACTICES
A. Geometric Terms: Specify locations and describe spatial relationships using coordinate geometry and other representational systems.		
1. Classify lines, rays, and line segments as horizontal, vertical, or oblique.		
2. Identify line of symmetry in simple geometric figures.		
3. Manipulate figures in three kinds of moves (translating, reflecting, rotating).	<p>Translation</p>  <p>Reflection</p>  <p>Rotation and translation</p> 	

<p>B. Identify and Classify Shapes: Analyze characteristics and properties of 2-D and 3-D shapes and development mathematical arguments.</p>								
<p>1. Identify and draw acute, obtuse, right and straight angles.</p>								
<p>2. Classify triangles by size of angle (acute, right, obtuse) and by length of sides (isosceles, obtuse, equilateral).</p>	<table border="0"> <tr> <td data-bbox="737 748 1150 971"> <p>Obtuse Triangle Has an angle greater than 90°</p>  </td> <td data-bbox="1150 748 1409 971"> <p>Isosceles 2 equal sides</p>  </td> </tr> <tr> <td data-bbox="737 971 1150 1182"> <p>Right Triangle Has a right angle 90°</p>  </td> <td data-bbox="1150 971 1409 1182"> <p>Equilateral equal sides</p>  </td> </tr> <tr> <td data-bbox="737 1182 1150 1382"> <p>Acute Triangle All angles are less than 90°</p>  </td> <td data-bbox="1150 1182 1409 1382"> <p>Scalene No equal Sides</p>  </td> </tr> </table>	<p>Obtuse Triangle Has an angle greater than 90°</p> 	<p>Isosceles 2 equal sides</p> 	<p>Right Triangle Has a right angle 90°</p> 	<p>Equilateral equal sides</p> 	<p>Acute Triangle All angles are less than 90°</p> 	<p>Scalene No equal Sides</p> 	
<p>Obtuse Triangle Has an angle greater than 90°</p> 	<p>Isosceles 2 equal sides</p> 							
<p>Right Triangle Has a right angle 90°</p> 	<p>Equilateral equal sides</p> 							
<p>Acute Triangle All angles are less than 90°</p> 	<p>Scalene No equal Sides</p> 							

3. Identify different types of quadrilaterals (parallelogram, trapezoid, trapeziums).

Classification of Quadrilaterals

Shape	Characteristic	Name
	No sides parallel	Trapezium
	Exactly one pair of parallel sides	Trapezoid
	Two pairs of parallel sides	Parallelogram
	Parallelogram with congruent sides	Rhombus
	Parallelogram with right angles	Rectangle
	Rectangle with congruent sides	Square

Note that squares, rectangles, and rhombuses are types of parallelograms and that a square is a type of rectangle and a type of rhombus.

4. Identify properties of a circle (radius, diameter, circumference).

5. Identify 3-dimensional figures by their faces, vertices, and edges (geometric solids).

Figure	Faces	Edges	Vertices
Cube	6	12	8
Rectangular Prism	6	12	8
Pyramid	5	8	5
Sphere	0	0	0
Cylinder	2	0	0
Cone	1	0	1

C. Geometric Formulas:
Use visualization, spatial reasoning, and geometric modeling to solve problems.

1. Identify and use formulas for area and perimeter for regular polygons.	Rectangle: Area = $l \times w$, Perimeter = $2l + 2w$ Square: Area = s^2 , Perimeter = $4(S)$	
2. Identify radius when given diameter and identify diameter when given radius.	Radius = $\frac{1}{2}$ Diameter $r = \frac{1}{2} d$ Diameter = $2(\text{radius})$ $d = 2(r)$	
3. Compute area of a triangle.	Area = $\frac{bh}{2}$ Perimeter = $A + B + C$	

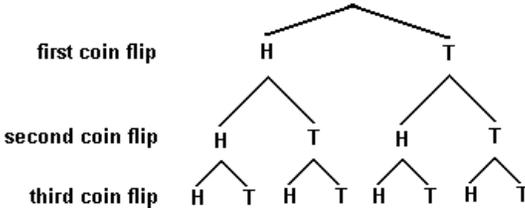

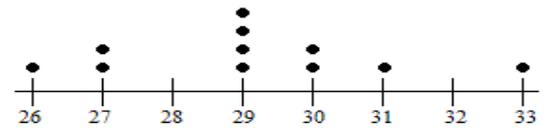

Archdiocese of Santa Fe Standard 5:

Data Analysis, Statistics and Probability:

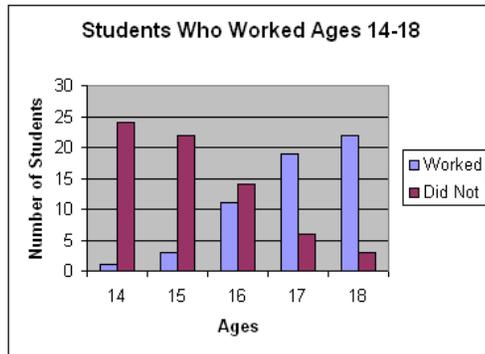

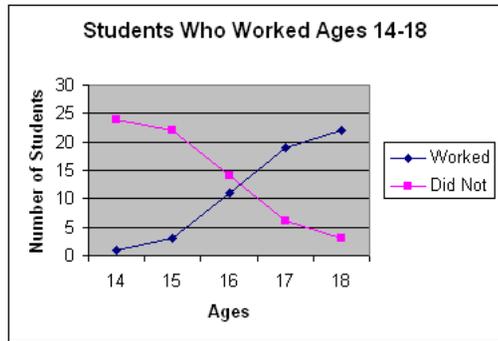

Students formulate questions that can be addressed with data and collect, organize, and display relevant data to answer them; select and use appropriate statistical methods to analyze data; develop and evaluate inferences and predictions based on data; and understand and apply basic concepts of probability. NCTM

Critical for Mastery in Grade 5

LEARNING OUTCOMES (What students will be able to do, know, understand and value)	SAMPLE ASSESSMENTS/STRATEGIES (What evidence will demonstrate that students have achieved the Learning Outcome)	BEST PRACTICES
A. Statistics: Select and use appropriate statistical methods to analyze data.		
1. Compute the mean, median, range, and mode of a data set.	Student Ages: 13,10,10,11,11,10,11 Arrange from least to greatest 10,10,10,11,11,11,13 Mean: $10+10+10+11+11+11+13 = 76$ $76 \div 7 = 10 \frac{6}{7}$ Median: 11 Range: $13-10 = 3$ Mode: bimodal 10 and 11	
B. Probability: Understand and apply basic concepts of probability.		
1. Use the word chance to express likelihood of an event happening, not happening, or equally happening or not happening.	50% chance of rain-equally happening or not happening.	

<p>2. Make and justify valid inferences, predictions and arguments of a possible outcome set.</p>																							
<p>3. Use fractions and percents to compare data sets of different sizes.</p>	<p>If 10 of the 50 pieces of candy are green what fraction and percent of candy is green? $\frac{1}{5}$ and 20% are green. 30 out of 50 is what fraction and percent? $\frac{3}{5}$ and 60%</p>																						
<p>C. Data Analysis: Develop and evaluate inferences and predictions that are based on data.</p>																							
<p>1. Design investigations and represent collected data using tables (Frequency Table).</p>	<p style="text-align: center;">Number of Students per Classroom</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th>Students</th> <th>Tally</th> <th>Frequency</th> </tr> </thead> <tbody> <tr> <td>26</td> <td> </td> <td>1</td> </tr> <tr> <td>27</td> <td> </td> <td>2</td> </tr> <tr> <td>29</td> <td> </td> <td>4</td> </tr> <tr> <td>30</td> <td> </td> <td>2</td> </tr> <tr> <td>31</td> <td> </td> <td>1</td> </tr> <tr> <td>33</td> <td> </td> <td>1</td> </tr> </tbody> </table>	Students	Tally	Frequency	26		1	27		2	29		4	30		2	31		1	33		1	
Students	Tally	Frequency																					
26		1																					
27		2																					
29		4																					
30		2																					
31		1																					
33		1																					
<p>2. Interpret and create line plots.</p>	<p style="text-align: center;">Line Plot: Number of Students per Classroom</p> 																						
<p>3. Identify clusters and outliers in a set of data.</p>	<p>Cluster: 26 and 27 also 29, 30, 31 Outliers: 33</p>																						
<p>4. Interpret and display data in a line graph, pictograph, stem-and-leaf plot, circle graph, bar graph, and Venn diagram.</p>	<p>Stem-and-leaf</p> <pre> 2 6 7 7 9 9 9 9 3 0 0 1 3 </pre>																						

5. Create double-line and double bar graphs to compare two sets of similar data.

6. Interpret double line and double bar graphs.

- More students worked when they were older.
- The largest increase in students working was at 18 years old.

Archdiocese of Santa Fe Standard 6:

Mathematical Processes:

With opportunities integrated throughout the curriculum, students develop mathematical practices and processes such as solving problems, making connections, understanding multiple representations of mathematical ideas, communicating their thought processes, and justifying their reasoning appropriate to grade level. NCTM

Mathematical Processes and Practices:	Teacher Notes:
1. Students make sense of problems and persevere in solving them.	
2. Students select and use various types of reasoning and methods of proof.	
3. Students construct viable arguments and critique the reasoning of others.	
4. Students evaluate the reasonableness of predictions, estimations and solutions.	
5. Students use a variety of tools and strategies in problem solving.	
6. Students attend to accuracy and precision and proof their work.	
7. Students use a variety of mathematical representations to organize, record and communicate mathematical ideas.	
8. Students apply mathematical knowledge and skills routinely in other content areas and practical situations.
